EDUCATION

University of Illinois Urbana-Champaign

Master of Science, Business Analytics, Gies College of Business, 2024

GPA: 3.93/4.0

Relevant courses: Data Science and Analytics, Business Intelligence, Consumer Analytics, Data Storytelling, Enterprise Data Management, Big Data Analytics in Finance, Big Data Platforms, Quanta Mental Investments (Bloomberg)

Dwarkadas J. Sanghvi College of Engineering

Bachelor of Engineering, 2021

GPA: 7.75/10.0

Relevant courses: Logistics & Supply Chain Management, Operations Research, Economics, Finance, Accounting & Costing

SKILLS

- Programming Languages: Python, SciPy, R, C, C++.
- Data Tools and Software: Excel, VBA, Macros, Microsoft Office, Google Sheets, Google Scripts, SQL, ETL, Alteryx, [Tableau](#), Power BI, NoSQL, Machine Learning, Causal Inference, Advanced Excel (v-lookup, pivot tables, and formulas), SSRS, SSIS, Talend, KNIME Analytics, Looker, Quicksight BI, SAS, OLAP, OLTP, Data Warehousing, Starburst
- Infrastructures: Amazon Web Services-S3, Redshift, RDS, Glue, Crawler, EC2, Lambda, Databricks, Pyspark, Apache Airflow, Sagemaker, Azure, Hadoop, Hive, MongoDB, Snowflake, Athena, SAP S/4HANA, DAG, Azure Data Factory

EXPERIENCE

Fundae

Data Analyst

June 2024 – Present

- Designed and implemented a process leveraging OpenAI APIs to automate the reading and maintenance of manually generated GPO data for **Gilead** and **Johnson & Johnson**. This solution **reduced manual intervention by 100%**.
- Designed and deployed robust ETL using AWS Glue and PySpark. Developed Tableau reports to identify discrepancies in EDI 852, 867, 180, and 812 records, enabling **\$10M in cost savings** through improved data accuracy and efficiency.

Caterpillar

Data Science Lead (Business Practicum)

August 2023 – May 2024

- Leveraged AWS Redshift's data warehousing capabilities to design scalable solutions for analyzing multi-terabyte datasets, enabling real-time insights and predictive analytics, which improved operational efficiency and **reduced downtime by 15%**.
- Achieved great prediction accuracy by implementing forecasting techniques, resulting in a **90% accuracy of outbound freight cost** forecast (line haul and fuel price), leading to **cost savings of \$ 4.2 M**.

Hansa Cequity

Data Analyst

August 2021 - August 2023

- Developed customer segmentation models, using K-means clustering and random forest, to analyze customer demographics for different product categories, designing targeted digital media campaigns to achieve a **40% increase in engagement**.
- Implemented and managed SQL stored procedures and SSIS ETL/ELT to automate data loading, transformation, and reporting tasks, resulting in a 4-hour daily reduction in **manual effort and processing time**.
- Developed and automated reports using SSRS and BI tools. Additionally, I leveraged Tableau and Power BI to visualize data in a granular manner. This resulted in **90% fewer reports to manage**, increasing efficiency in data-driven decision-making.

Happy Grub

Intern, Business Analyst

Jan 2020 - June 2020

- Collected e-commerce data from Google AdSense and Facebook Ads to calculate key metrics such as Customer Acquisition Cost (CAC), Burn Rates, Average Revenue Per User (ARPU), Churn, and Retention. Automated data processing using **Excel, macros, and VBA**, enabling efficient analysis and marketing strategies, resulting in a 40% increase in MOM users.
- Engineered a data-driven business strategy through advanced customer patterns and market basket analysis, leveraging **Excel-based tools** to optimize processes and driving a substantial 60% increase in repeat order rates.

PROJECTS

Property Valuation Model

Oct 2023 - Nov 2023

R, Statistical Modelling, Lasso Regression, Linear Regression, Random Forest

- Researched and implemented a housing valuation model accounting for 20+ variables through a multimodel approach and achieved **10% lower MSE than the benchmark**.

Researcher Grant Matching

Jan 2024 – March 2024

Large Language Model, Retrieval Augmented Generation

- Scraped and unified data of 3000+ researchers and 100+ grants into a Dash-based web app powered by LLMs. Leveraged RAG for curating matches of grants and research.

Stock Screener Dashboard

Mar 2024 – Apr 2024

SQL, AWS cloud services (EC2, Redshift, S3) and Tableau

- Executed, designed, and developed a comprehensive stock screener. Automated daily data ingestion using Yahoo Finance and Alpha Vantage API and processing with Python scripts, enabling real-time analysis of stock performance and fundamentals using visualizations.
